Double-stranded cDNA was ligated to Eco RI adaptors (Pharmacia), digested with Not I and cloned into the Not I and Eco RI sites of the modified pT7T3 vector. Library is normalized. Library was constructed by Bento Soares and M. Fatima Bonaldo.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         BB367824 RIKEN full-length enriched, 16 days embryo head Mus

rhermostabilization and thermoactivation of thermolabile enzymes by
                                                                                                    prepared by using trehalose thermo-activated reverse transcriptase and subsequently enriched for full-length by cap-grapper. Second strand cDNA was prepared with the primer adapter of sequence [5' and adapter of sequence [5' and adapter of sequence [7' as a closed into the XhoI and BamHI sites. Vector: a modified pBluescript KS(+) after bulk excision from Lambda
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             250
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Contact: Yoshinide Hayashizaki

Division of Experimental Animal Research in Riken contributed to prepare mouse tissues. 1st strand cDNA was primed with a primer [5. GAGAGAGAGAGCGCAACTGAGTTTTTTTTTTTTTTTTVN 3'], CDNA was prepared by using trehalose thermo-activated reverse transcriptase and subsequently enriched for full-length by cap-trapper. Second strand CDNA was prepared with the primer adapter of sequence [5.
BB518921 RIKEN full-length enriched, 16 days neonate heart wus musculus cDNA clone D83003xK05 3' similar to AF126063 Mus musculus connective tissue growth factor-like protein precursor (Ctgfl) mRNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Mus musculus

GAGAGAGAGCGCCCCAACTCGACTTTTTTTTTTTTVN 3'], CDNA was prepared by using trehalose thermo-activated reverse transcriptuse and subsequently enriched for full-length by cap-trapper. Second strand cDNA was prepared with the primer adapter of sequence [5' GAGAGAGATTATTATATTATATATCCCCCCCCCCC 3']. CDNA was cleaved with BamHI and XhoI. Vector: a modified pBluescript KS(+) after bulk excision from Lambda FLC I."

Pred. No. is the number of results predicted by chance to have a

em\_htgo\_mus:\*
em\_htgo\_other:\*

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

MISP genes are members of the connective tissue growth factor
family that are up-regulated in wnt-1-transformed cells and
aberrantly expressed in human colon tumors

                                  Agents that stimulate or inhibit HICP protein activity or expression.

antisense HICP nucleic acid molecules and HICP antibodies, can be used to
modulate cell-associated activity. HICP modulators can be used to
disorders characterized by aberrant HICP protein activity or expression.

Probes capable of hybridizing to HICP mRNA or antibodies specific for
HICP can be used to detect HICP activity in a biological sample. HICP
can be used to treat disorders, such as a cardiovascular or fibrotic
disorder, characterized by aberrant cell proliferation.
